

Blockchain India Challenge

Proof of Concept (PoC) Evaluation

I) Template for submitting the details related to the developed PoC solution by 25th July 2026, through email to bct-challenge@cdac.in

1. **Startup Introduction** (Startup Name, Solution Title, Use Case Category, Team Members, PoC Evaluation Date)
2. **Problem Statement**
What problems are you solving through your solution. Mention the details such as - Government department/customer, Existing process, Pain points, Current challenges
3. **Solution Overview**
How would the proposed Blockchain based solution overcome the current challenges in the system, covering the details such as Proposed System, Blockchain Layer, Involved Stakeholders, Expected Benefits/ Value addition, why permissioned blockchain
4. **Innovation & Originality** - Novel contribution, Differentiators, Existing alternatives, IP generated, Open-source components used, Startup-developed components (Network Setup - No of nodes, Smart contracts, APIs, Consensus mechanism)
5. **Proposed solution Technical Architecture covering the details such as -** Stakeholders, Web/Mobile App, API Gateway, Blockchain Network, Smart Contracts, Database, External systems, Government integration, Blockchain platform, Infrastructure, Security layers
6. **Which of the Blockchain features would be demonstrated through the PoC solution** - Immutable Ledger, Smart Contracts, Digital Identity, Audit Trail, Role-based Access, API Integration, Data Integrity
7. **Validation Results/ Performance Metrics (whichever applicable)**
 - Technical (Transaction success rate, Average latency, Throughput, Response time)
 - Business (Time saved, Cost reduction, Manual effort eliminated, Market segment for the proposed solution)
 - Value addition to End User (Transparency, Trust, Ease of use)
8. **Security & Compliance** (Authentication, Authorization, Encryption, Privacy, Key management, Audit logs, Compliance, Data protection)
9. **Association with Government departments**
 - Interactions with Govt departments
 - Study of existing government systems/workflows in your domain

- Analysis of Scalability & Deployment requirements

10. PoC Achievements

Briefly summarize the achievements or features supported in PoC solution

11. Roadmap to MVP

Please provide timelines for next 3 Months including the details such as implementation of Value-added features using emerging technologies, Testing, Vulnerability Assessment, Production readiness

12. PoC Demonstration

Demonstration of overall workflow of the PoC solution which includes the features & details mentioned in point 6 and 10

Note: All the Startups are requested to present their PoC solution to the Jury Committee covering all the above-mentioned aspects during the PoC evaluation.

II) Jury Committee Evaluation Scorecard (50 Marks)

S.No	Criteria	Marks
i.	Technical Proof & Implementation Viability (Innovation & originality, Blockchain Suitability, Technical architecture, Working PoC demonstration)	15
ii.	Security, Performance & Compliance	10
iii.	Stakeholder Alignment & Scalability Potential	10
iv.	Commercial viability	10
v.	Team Capabilities (Presentation & Clarity)	5
	Total	50
